- Industry Press Releases
- Industry News

Complete **Warehousing, Distribution, and Logistics** services, technologies and methodologies are covered. This coverage includes continuous evaluation of supply chain practices.

The Journal will bring you the most recent **Trends and Innovations** (including the implications of globalization, convergence of control systems deployed worldwide and the implications of increasing technology). We will follow developments in technology that affect all types of inventory tracking and supply chain strategies for local, national and international commerce.

The Journal will always bring you recent and relevant **Case Studies** of industry leaders and implementations that will enable you to improve your operations.

Logistics is that part of the supply chain process that plans, implements, and controls the efficient, effective flow and storage of goods, services, and related information from the point of origin to the point of consumption in order to meet customers' requirements.

The leading **Transportation** experts will always have a forum for sharing their experiences and providing information about the most recent local, national, and international issues.

Who are the leading **Equipment** suppliers? The Journal will always provide a future technology section that will forecast the next generation of leading equipment and technologies.

Who are the leading **Inventory Management and Logistics Software** suppliers? The Journal reports the latest news on logistics execution systems (LES) covering WMS, TMS and LMS, and supply chain execution systems, which include order management systems (OMS), supply chain visibility (SCV), and supply chain event management (SCEM) systems, as well as links to enterprise-level planning systems.

This is the forum for **Industry Experts and Academic Leaders** to comment on the state of the industry.

E-commerce is a constantly changing medium. The Journal will keep you apprised of how e-commerce is affecting the **Supply Chain** and the best ways to combine both.
